REPLY TO: 2510 River Surveys

SUBJECT: Indian Point Sale
Stream Protection Summary

TO: Bryce Rickel
Fisheries Biologist

September 22, 1981

Unit #9

This unit contains one significant stream. It dramatically enters the unit in a waterfall and then meanders around the downhill boundary. No fish were shocked within the unit, or where the stream crossed spec. rd. 3476 C (@ 1/3 mile from Unit #9). Because of the lack of fish, and the low fish productivity of the major Francis Cove drainage downstream, no stream protection prescriptions are deemed necessary.

Stream flows into ADF#6 = 101-90-44
